BOTTOM WEB FILMS

Rigid thermoforming films supplied as bottom web rollstock. Custom-made for MAP and VSP packaging, with material and barrier options to suit your product and equipment.

FEATURES & BENEFITS

PROCESSORS

- Designed for high-speed packaging operations.
- Available in APET & RPET.
- Customised to suit your existing PET thermoforming and form-fill-seal equipment, subject to application and line validation.
- Choice of recyclable options available.
- Drop-in solution that works across standard PET thermoforming and fill and seal equipment, with no need to change to existing equipment.

PRODUCT PROTECTION

- Barrier options help manage oxygen and moisture transmission to support extended shelf life. Puncture resistance helps protect pack integrity.

PRODUCT PRESENTATION

- Available in clear, recyclable NIR black and custom-coloured options to complement your brand.

PACKAGING FORMATS

- MAP and VSP options are described overleaf. Film structure and sealing compatibility are selected for the intended format.

TECHNICAL DATA

Applications

- Smallgoods and processed meats, including ham, bacon and deli lines; fresh red meat, poultry and seafood.

Characteristics

- Thermoformable PET-based rollstock. Mono-PET, PET/PE and PET/PE/EVOH bottom web rollstock.

Sustainability

- PREP-assessed and Australian kerbside recyclable options. Recycled PET options and certified NIR black available.

Compliance

- Meets applicable AS 2070, FDA food-contact and EU 10/2011 requirements. Contact us for compliance details for the selected structure.

TRAY

Note:
Recommended storage conditions: Store in clean, dry conditions out of direct sunlight and below 30°C.
